

PhD position in Quantitative Biology

The Meller lab in the Biomedical Engineering department at the Technion, is offering an exciting opportunity for a new PhD position in quantitative biology, for a cutting-edge project in the field of translation initiation of proteins.

The research project will involve protein biochemistry, cell biology and state-of-the-art microscopy for live cells imaging.

REQUIREMENTS:

1. Highly motivated individuals, who completed their MSc studies in one of the fields: Biology or Biotechnology.
2. Highly dedicated, works well individually as well as a team player.
3. Must have a good knowledge of molecular biology techniques.
4. Experience in cell culture / protein chromatography methods would be an advantage.
5. Interest in super resolution microscopy techniques.

APPLICATIONS:

Please contact **Prof. Amit Meller** by email ameller@bm.technion.ac.il and send your CV and a cover letter containing a short description of your MSc research and your current research interests.

Adequate candidates will be invited for a personal interview.

More info can be found at: <http://meller.bm.technion.ac.il>
